Presek žarka z absciso

Dani sta točka $A(-a, v)$ in točka $C(0, b)$.

Točka B je presek žarka, ki gre iz A skozi izhodišče in žarka, ki gre iz C navpično navzdol.

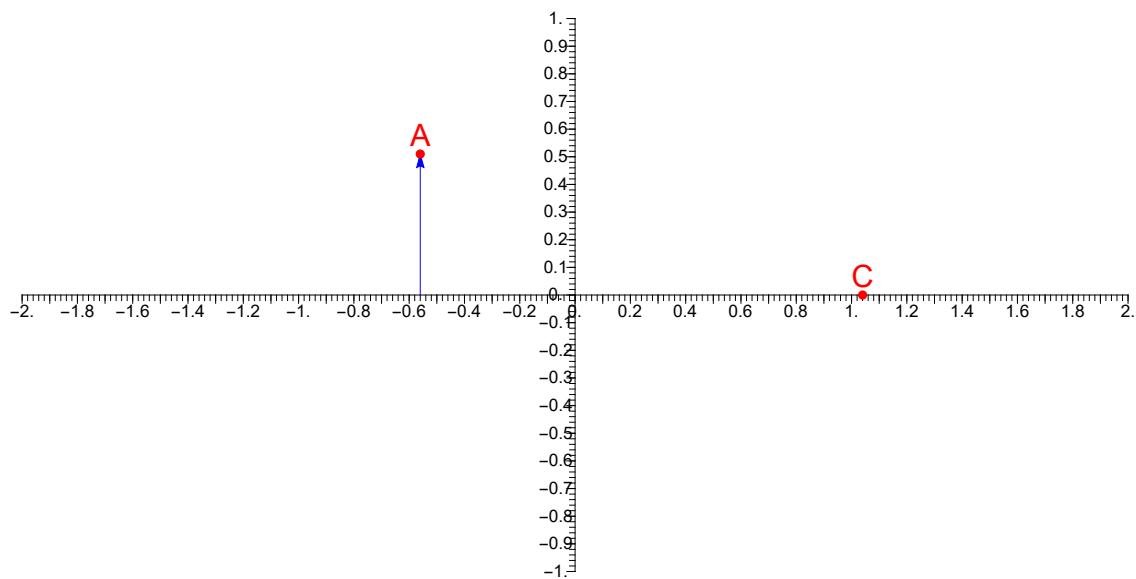

Točka D je presek vodoravnega žarka iz A z navpično osjo.

Točka F je presek daljice DB z vodoravno osjo.

Koliko je abscisa f točke F ?

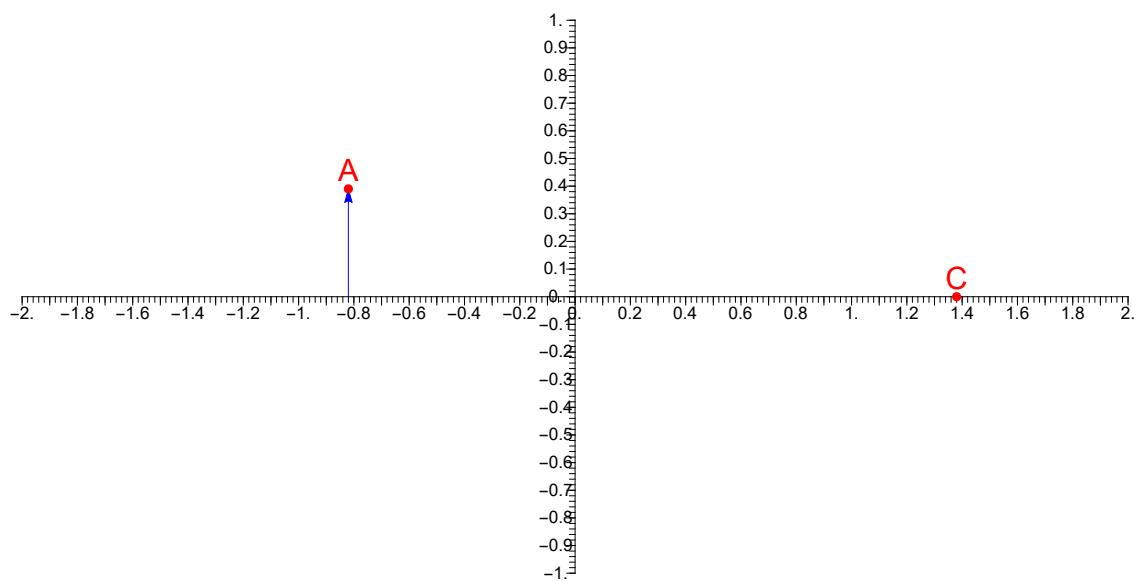

Odčitano vrednost primerjaj z izrazom $ab/(a+b)$, izračunanim na 2 decimalki.
